Manual

1. The screen

Area	What it shows
Cab view	What the driver sees. The left, rear and right mirrors (or around-view monitor) appear at the top.
Top view	A map seen from above. It shows the load numbers and the spots with the same numbers.**The orange circle**is the guide; drag it with your finger or mouse to move where they stand.
Signal panel	Shows the AI guide's signals and tutorial explanations. Fold it with "Minimize".
Control buttons	At the bottom in portrait, on the sides in landscape (change in "Settings" → "Control button layout").
Top bar	Score, loads carried, time, speed, fork height, tilt and load sway. The buttons on the right are "Sub-view", "Full screen", "Sound", "Records" and "Menu (pause)".

2. How to play

1. Drive to the front of the load. Before aisles, stop and do a**Point & call**(right clear, left clear).
2. **Fork control**— switch to it, match the fork height to the pockets, then move forward slowly to insert.
3. Lift a little, then back away and turn (drive with the forks 10–20 cm off the floor).
4. Stop in front of the spot with the same number, lower, and reverse to pull the forks out.

First-timers can practise by following the glowing buttons in "Play" → "How to play" (about 4 min).

3. On-screen buttons (3 control methods)

You can switch the control method any time on the start screens of "Play" and "Learn", or from the pause menu.

Button controls (for first-timers)

Buttons	What it does
◀ / ▶	Steer left / right (only while held; with "keep steering" on, it stays where you turned it)
Forward / Reverse	Move forward / back only while held
Fork control	Switch to the screen for picking up / putting down loads
Raise / Lower	Raise / lower the forks
Tilt fwd / Tilt back	Tilt the mast forward / back
Point & call	Press before aisles

Fork control

Buttons	What it does
◀ / ▶	Forks left / right (side shift). For clamps it's "Open / Close", for the positioner "Narrower / Wider"
Forward / Reverse	Move forward / back slowly (hold for a bit faster)
↺ / ↻	Turn slightly on the spot
Raise · Lower · Tilt fwd · Tilt back	Load handling
Back to driving	Back to the driving screen

Stick controls

Buttons	What it does
On-screen stick	Drive and turn in the direction you push
Reverse	Back straight up
Raise · Lower · Tilt fwd · Tilt back	Load handling
Fork control · Point & call	Same as button controls

Real layout (same as the real thing)

Buttons	What it does
◀ / ▶	Steering
Direction lever F · N · R	F = forward, N = neutral, R = reverse
Inching (left foot)	Move slowly (fine adjustment for handling)
Brake / Accelerator (right foot)	Stop / go. With creep on, the truck moves off slowly when you release the brake
Parking brake	Set / release (so the truck doesn't move during pallet work)
Show lift levers	Switch between steering ⇄ lift, tilt and side-shift levers
Point & call	Press before aisles

If buttons are small or hard to reach, use "Settings" → "Control button layout" to split left/right, switch to left-handed or change the size.

4. Keyboard (PC)

Shows your current assignments. Change them in "Settings" → "Keyboard assignment".

Driving · steering

Controls	Key
Forward / accelerator (slow forward during fork control)	↑ · W
Reverse / brake (slow reverse during fork control)	↓ · S

Controls	Key
Steer left (forks left during fork control)	←·A
Steer right (forks right during fork control)	→·D
Reverse (stick controls)	B
Inching (real layout)	Left Shift · Right Shift

Handling

Controls	Key
Raise / pull lift lever	Q
Lower / push lift lever	E
Tilt forward (roll clamp: upright)	Z
Tilt back (roll clamp: sideways)	X
Side shift left / rotate left (clamp: open, positioner: narrower)	,
Side shift right / rotate right (clamp: close, positioner: wider)	.
Toggle fork control (button controls)	G

Real layout

Controls	Key
Direction lever F (real layout)	1
Direction lever N (real layout)	2
Direction lever R (real layout)	3
Parking brake (real layout)	B

Safety

Controls	Key
Point & call	C
Seat belt (test course)	J
Parking brake (test course)	K

Screen

Controls	Key
Pause · menu	P
Switch view	T
Full screen	F

Controls	Key
Sub-view on/off	V
Sound on/off	M

Guide mode signals

Controls	Key
Signal: Forward	W・↑
Signal: Reverse	S・↓
Signal: Left	A・←
Signal: Right	D・→
Signal: Straight	X
Signal: Stop	Space
Signal: Slow	Z
Signal: Forks up	Q
Signal: Forks down	E
Signal: Point & call	C

5. Game controller

Connect via Bluetooth and it works automatically (standard-layout controllers such as PS, Xbox, Switch Pro). Shows your current assignments. Change them in "Settings" → "Game controller".

Driving

Controls	Buttons
Steering (drive stick in stick controls)	Left stick
Accelerator (real layout) · forward (button controls in fork control)	R2
Brake (real layout) · reverse (stick controls · fork control)	L2
Inching (real layout)	L1
Direction lever forward (R→N→F · real layout)	D-pad ↑
Direction lever back (F→N→R · real layout)	D-pad ↓
Parking brake (real layout)	None

Handling

Controls	Buttons
Lift up	Right stick ↑

Controls	Buttons
Lift down	Right stick ↓
Tilt forward (roll clamp: upright)	Right stick →
Tilt back (roll clamp: sideways)	Right stick ←
Side shift left (clamp: open · positioner: narrower)	D-pad ←
Side shift right (clamp: close · positioner: wider)	D-pad →
Hold and move the tilt stick for side shift	R1
Toggle fork control (real layout: steering ⇄ lift levers)	A (×)

Safety · screen

Controls	Buttons
Point & call	B (○)
Switch mirrors (test course: seat belt)	X (□)
Switch view (test course: parking brake)	Y (△)
Sub-view on/off	Select (Share · View)
Pause · resume	Start (Options · Menu)

Guide mode

Controls	Buttons
Signal: Forward (オーライ)	D-pad ↑
Signal: Reverse (バック)	D-pad ↓
Signal: Left	D-pad ←
Signal: Right	D-pad →
Signal: Stop (ストップ)	B (○)
Signal: Straight	A (×)
Signal: Slow (ゆっくり)	X (□)
Signal: Point & call	Y (△)
Signal: Forks up	L1
Signal: Forks down	R1

6. Guide mode

You become the guide and lead the AI driver to the spot with signals. Drag the orange circle in the top view to change where you stand. Dangerous places show

"Danger".

Signal (button)	Meaning	Key	Controller	Say in Japanese
オーライ	OK to move forward	W・↑	D-pad ↑	オーライ・前進・前へ
バック	OK to reverse	S・↓	D-pad ↓	バック・後進・後ろ
左へ	Steer left	A・←	D-pad ←	左
右へ	Steer right	D・→	D-pad →	右
まっすぐ	Bring the steering back to centre	X	A (×)	真っ直ぐ・真っすぐ・直進
ストップ	Stop immediately	Space	B (○)	ストップ・止まれ・止まって
ゆっくり	Go slowly	Z	X (□)	徐行・スロー
上げ	Raise the forks	Q	L1	上げ・アップ
下げ	Lower the forks	E	R1	下げ・ダウン・下ろせ
指差	Point & call	C	Y (△)	右よし・左よし・右ヨシ

Start voice signals with the "Voice" button (works when online). Signals are recognised in Japanese. You can change the signal names to match your site in "Guiding tips · site rules".

7. Switching views & display

Buttons	What it does
Mirrors	Switch between left/right mirrors, around-view monitor and none
View: Driver, etc.	Guide mode: switch the view between driver, guide, bird's-eye, side, rear, front, crouch and alignment diagram (key T)
Position: Auto / Fixed	Whether the guide moves on their own or stays where you dragged them
⇄ Swap	Swap the cab view and the top view
Sub-view / Sub-view position	Show and position the small screen
Full screen	Fill the screen (key F)

8. Troubleshooting

When…	Do this
Buttons are small / overlap	Change the size or left/right layout in "Settings" → "Control button layout"
Voice signals don't work	Check you're online. Offline, use the signal buttons. Also check microphone permission
The controller doesn't respond	Press any button once (so the browser detects it). Check that "Settings" shows "Connected"

When…	Do this
I want to stop partway	Pause with "Menu" (key P). You can go back to the title
My records disappeared	Records are saved in this device's browser. A different browser or moving the file means separate records
I want to use it without internet	On phones, "Add to Home Screen"; on PCs, "Download PC file" (in Settings → "Use offline")

This app is for learning. To operate a forklift you must complete the official operator training or special education. Ver.52
